# ASPiON ■ G-Log

Shock data logger

Awarded with:

INNOVATION AWARDS BW 2021

## Powerful sensor technology

- Precise 3-axis recording of shocks with up to  $\pm 24$  g per axis
- Additional exact shock curve in milliseconds
- Factory calibrated sensors over the entire operating life
- Position visualisation via gravitational force
- Logging of temperature values
- Freely selectable threshold values

## Easy handling and sustainability

- Permanent memory for event recording
- Compact ABS housing IP 50, 35 grams, easy to fix
- Wireless data transmission via NFC
- Individually configurable, universally applicable
- Long battery life and long shelf life
- Battery replaceable by the manufacturer, not subject to labelling
- Approved for air freight
- Market-leading price/performance ratio

## PC software for Windows

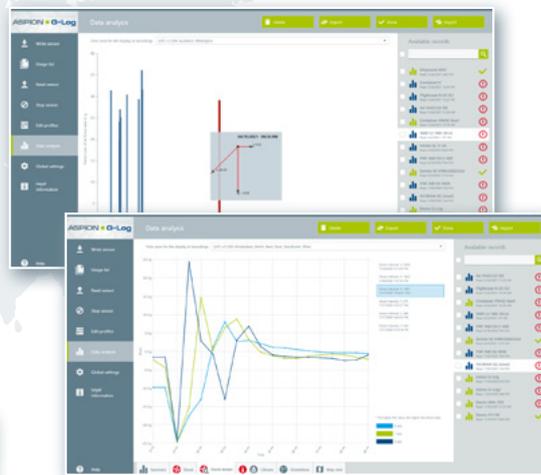

- Wireless operation of the data loggers via NFC with USB card reader
- Numerous functions: start/stop time-controlled, profile settings, shipment assignment, runtime check, meaningful evaluations, various export formats, etc.
- Multi-site operation with comprehensive options for configuration and application
- High level of user-friendliness

## Smartphone app for iOS and Android

- Wireless readout via NFC
- Evaluation by traffic light function and in detail
- Sending of evaluations by e-mail or automatically via cloud transfer
- Tamper resistance and simple operation

Including royalty-free PC software and app in multiple languages

Waterproof version available
