

ASPION data loggers managed easily

Flexible. Process-safe. Transparent.

## ASPION ■ G-Log PREMIUM

With ASPION G-Log Premium you extend the performance range of the shock data loggers: Activate the data loggers simply via app, transfer reports automatically and simplify the entire handling. The software-based service, equipped with cloud storage, can be put into operation in just a few minutes.

### Extensive features

- Scope of performance of shock data loggers extended by cloud storage
- No memory limitation, depending on readout frequency practically unlimited recording
- Accumulation of shock and climate values for a complete data analysis
- Flexible and process-safe operation via smartphone app without additional infrastructure

### Full flexibility for transparency and process reliability

- Maximum flexibility and full transparency guaranteed at all times
- Process-safe and location-independent activation of ASPION G-Log 2 data loggers via app, e.g. by external suppliers and service providers
- Also suitable for the secure tracking of goods that change location several times
- Simple and secure resetting and re-activation of ASPION G-Log 2 data loggers without data loss - even in transit
- No need for expensive hardware or infrastructure - simply use a smartphone to communicate with the data loggers and the cloud storage

### Simple handling at all levels

- Automated transmission of all reports via cloud transfer directly after readout
- Cross-site operation in the company network with shared data access
- Simple assignment even with many data loggers due to transmitted location data when reading out the loggers
- No instruction or training required to operate the app

### Secure and reliable

- Software developed in Germany and hosted in TÜV-certified German data center
- Intelligent encryption mechanisms provide for protected data transfer
- Complete process security even with divided business structures

### Prices

- Low one-time installation fee
- Annual fee for cloud storage depending on transfer volume, starting from €240 per year

### System requirements

- Server/computer with Windows operating system Version 10 or higher
- .NET Framework V4.8 or higher

Excellent all-in-one solution for medium-sized and globally operating corporations
