ASPiON ∎ L-Track

Multi-sensor data logger with live tracking

360° transport monitoring in real time

Live. Worldwide. Sustainable.

100 % MADE IN GERMANY

100 % HOSTED IN GERMANY

Transparency and security for your supply chain

Your advantages

- Complete transparency about the shipment process, including current location and condition of your goods, at any time and worldwide
- Active intervention and management of your supply chain via live data
- Reliable monitoring of shocks and relevant environmental conditions
- End-to-end solution with high-performance cloud platform
- Evidential proof for business partners and insurance

ASPiON

ASPION ■ L-Track

Multi-sensor data logger with live tracking
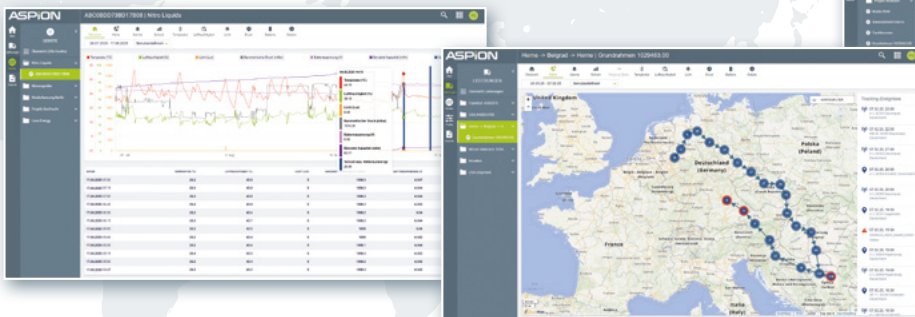

Worldwide tracking: powerful hardware

- Data transmission and location tracking from over 140 countries – cellular (LTE-M/2G) and optionally with GPS
- Precise 3-axis recording of shocks in the course of milliseconds with up to ± 24g per axis
- Versatile sensors for temperature, humidity, movement, light, opening and other environmental conditions
- Triggering of alarms when threshold values are violated
- Seamless logging of measured data even without connectivity
- Robust, outdoor and industrial-grade ABS housing IP65/67, weight 250 grams incl. batteries

Easy handling: sustainable and safe

- Process-safe and location-independent commissioning without time-consuming configuration
- Long runtimes and user-replaceable AA batteries, not subject to labelling
- Can be used universally and multiple times over many years
- Secure encryption technologies and automatic firmware updates "over the air"
- Easy to mount, optionally available with magnets

ASPION Cloud: multifunctional IoT platform

- Worldwide live data of all devices throughout the entire transport/periode of use
- Tracking history in GDPR-compliant map view
- Transparent organization of shipments with all relevant information at a glance
- Freely customizable threshold values and geofences with extensive alerting functions
- Customizable exports in common file formats
- Multi-layered administration functions with unlimited user management
- High-performance, secure cloud application based on Deutsche Telekom's Cloud of Things
- German and English language versions

End-to-end solution: reliably from a single source

- Intelligent device hardware and multifunctional, secure IoT platform from a single source
- Easy handling and intuitive operation
- Integrated SIM card with fixed term and option to extend
- Quality product "Made and Hosted in Germany"

**Calculable, fixed costs
No automatic extension**

100% Made and Hosted in Germany
